ryder7788 I don't know if I can even put into words how great you guys are. I've been working with your seeds 5 years now, and mainly the GrapeStomper OG, High School Sweet Hearts, And Mendo Breath. Everything you guys do you do well. You put the work in. Your not popping off untested herm genetics that are dog shit for \$. You care, search, test, and it shows. If something has low germ rates you guys always fix the problem. In fact that's how I got the High School Sweet Hearts. Anyway, you guys have impacted my life, my children's lives, my families lives for the better. Odd how a tiny seed can do that. 🙏

alexanderthealchemist I met @keyplay7 and @fangjieshen at Seattle Hempfest like 5 1/2 years ago with the @probioticfarmersalliance and they dropped knowledge on me about mycellial growth in soil and how it benefits plants. A couple years later and I bump into them at high times and scooped a pack of benevolence f1s for my own personal breeding project. Popped the pack with 8 females and 3 males. The real keeper out of the bunch smelled like grapes and gas, oh boy. I was so impressed with it I didn't sell any of it haha. I've ran paragon, high school sweetheart, and some others from Gage green group. I admire the intention they put into their work, and because of their strict feeding practices, I know the seeds come from happy plants. In an industry aimed at making money, GGG does a good job at living in their dharma and employing the best practices.

cali_sav89 Years back i was lucky enough to get ahold of some Mendo Breath clones from Gage Green and till this day has to be one of my favorite/ tastiest strains ive ever grown... Everything was perfect about the plants from the root growth to the plant appearance from veg to bloom... Never had any problems or deficiencies. You can tell the passion Gage Green has to create the best strains out there and it shows in all their work and accomplishments. I definitely recommend anyone and everyone to try their products out, trust me you wont be dissapointed... I wasnt 👍

okmedrosie Love you guys
@gagegreengroup, I got a few cuts of
the grateful puff the best smelling cherry
gas 🚗, would recommend anyone
beginners or experienced to grow this
amazing plant, love you guys keep up
the great work. 🔥🍒🚗

growingherb Grape stomper was the first genetic by @gagegreengroup that I was lucky enough to be able to experience. I was taking care of one of the first rooms we flowered at Verde Natural, with 50 grape stomper, and 80 Durban haze. We were told it was a great yielder, everyone say that right? Week 5 rolls around and we thought it was just another strain, she was beautiful but didn't really wow us. Then week 6 came with vengeance, it was like she knew we were losing faith, she swelled up strong, with trichomes glistening you couldn't help but stare at her greatness. And it only continued to get more incredible up to the chop, dry, and cure. Still one of my favorite strains to grow and smoke today. Love y'all!! @gagegreengroup

chavalon24 I first got introduced to your genetics first hand by @ryder7788. when I got some cuts of #HighSchoolSweetHeart from her. After that I had to find your seeds and did even though my germ rate wasn't great your customer service was on point perfect to no end and so you sent me not just a replacement pack but a extra pack. My experience with you guys has been amazing.

nuculardonia Why I'm always running GGG? It doesn't matter what pack or flavor you get, if it says GageGreen on it, it's 🔥 fuego. Whenever i have to start my garden over, i always choose a couple flavors of GageGreenGroup genetics. I only have to pop half a pack because every female is a keeper. For beginners and for connoisseur growers, your sure to find a long time 💎 gem! I would definitely recommend.

friedsince85 When I purchased the Irene Kush x Grateful Breath at the @gagegreengroup booth at the 2016 Michigan cannabis cup directly from @fangjieshen. I knew the beans would be special. The booth had such a welcoming vibe. I would go on to post about purchasing the irene cross as well as a foo fighter x Grateful Breath pack and within a few hours @fangjieshen DM'd me and told me about a few issues that might come from the foo fighter cross and if I do have any to contact him and he'll do whatever he can to take care of me. What a stand up guy and thumbs up to #GGG for the transparency. Long story less long... I popped 2 irene x Grateful Breath beans and found an amazing keeper that everyone I know seems to be in love with. I can't say I've popped too many beans from other breeders but the fact I was able to find such an amazing pheno from 2 beans tells me there is more 🔥 to be found. Thank you @gagegreengroup and @fangjieshen for the amazing work. Can't wait to see what other fire comes from you guys! 🙏🙏🙏

dled14 JC GREEN uses your genetics!
Enough said! Top notch company
through and through. It doesn't matter if
you're producing 50grams or 200kgs
they cover you! From lp's to regular cats!
@gagegreengroup you will always have a
special place in my heart! Cheers

buckyrobertanthony I took a
#GratefulBreath while I was following the
#GuidingLight that led my ascension
path into the #5thDimension where I
found #LunaGolden and even though the
journey there wasn't always easy, we
shouted #MoLuneDay ! That no matter
what we'd always have better days filled
with healthy and happy cannabis 🌿

thepolaricecap Had the pleasure of experiencing the Mendobreath for about 4-5 indoor harvests. I believe it was a cut given to us at the time. Some of the most vigorous and captivating plants honestly. Didn't stretch too much, always produced, and the red/orange fade after a good flush 🔥🔥 I cant even explain how much I loved walking into a room of 100+ plants just reeking of warm buttermilk. I would recommend your genetics to anyone w the ability to purchase them. A little over my wallet budget at the moment but I hope to have a chance at running your gear in my personal grow soon. 👍👍

**GAGE GREEN GENETICS
WIN BACK-TO-BACK
CANNABIS CUPS - 2016**

APRIL 27, 2016 0 COMMENT

BREEDING, GAGE, GARDEN NEWS

GAGE GREEN GENETICS have won back-to-back championships at the High Times Cannabis Cup events in 2016! First, a GAGE team member and tester, Mass Cannabis, entered his wine-flavored Grape Stomper OG into Southern California's toughest category, the Indica Cup, only to come out at the very top!

A couple months later, Buds and Roses entered their CBD-dominant Breeder's Stash selection that they called

OMRITaxHASHPLANTxGRAPESTOMPER into the CBD category of the Colorado's 420
